

New Earth Vision--- Ulla Anderén and Gary Kendall

During the late summer of 2005 the two of us, Ulla Anderén and Gary Kendall, were in Mt. Shasta, California, attending a workshop with Amora Quan Yin. While visiting the mountain, St. Germain came through Ulla to acknowledge the earth-centered work we had already started and to say that he would now help us to set an agenda for activating the higher-dimensional earth that was to come. The Sirian Masters of Light came through Gary to say that they would help also and that a part of the agenda for this work would be restoring earth's original evolutionary plan.

The two of us, Ulla and Gary, are working for the New Earth. We have worked on sites in the US, Sweden, Guatemala, Peru, Madeira (Portugal), Egypt, Guam, Tanzania, Bali and Argentina. Our mission is to assist the evolution of the Earth and humanity to their next stage of spiritual evolution in alignment with the guidance given to us by the Ascended Masters and the star people assisting the Earth's transition.

We have established this newsletter to share knowledge and to make connection with others who are called to this work, who want to learn the teachings given to us and to travel with us to additional sites. Please, feel free to share this newsletter with others and to send us the email address of anyone who would like to receive future newsletters. And, if you feel called to participate in this work, write to us and let us know.

Come visit our website at <http://www.newearthvision.org!>

Our Backgrounds. *We have both studied energetic healing in Mt. Shasta with Amora Quan Yin who is our principal teacher. We have both also worked with Peruvian healers, especially don Victor Estrada who is the person who introduced us to each other back in 2000. Ulla started her spiritual training in Sweden with Ambres while Gary started his in the US with Peruvian teachers.*

Journey to the Giza and Sinai

December 27, 2007. Gary writes in his journal: Ulla and I are sitting together on the airplane on the way from Frankfurt to Egypt. We are sorting through the messages that we are receiving and trying to piece them together with what we had received before. Ulla connects with the place under the Sphinx and receives the message to "start the engine." That message reminds us of one we had received before from the Grand Masters of the Light, the guardians and judges of Earth's transition. "The key is in the lock," they said. We have all been talking about the transition to the New Earth for some years now. We used to talk about it as something that would happen at some future time. Something is different now. This is about to happen.

Our perspective on this trip has been expanding. This particularly happened after our trip to Tierra del Fuego where we had helped to bring in a new City of Light, one that manifested in the New Earth, not the old. We had originally understood this trip to Egypt as an effort to clear the energetic blockages that prevented the Sirians from coming back in and connecting to the pyramids and Sphinx in Giza as they had done in ancient times. Now we realize that our task includes helping to establish Giza and Sakkara in the New Earth. But the way things are now, it seems impossible for any of these places to shift into the higher dimensions. The alternative path, the path that was presented in Tierra del Fuego, is to begin building the future on the New Earth now. Now everything begins to move along two paths: one to the old earth and one to the new. To accomplish our task, we will have to work through bi-locating our group into the space of the New Earth. We do not know in advance exactly how the work with the Sirians will unfold. Our grasp of how this all fits together is still developing.

We have received some messages too about the difficulties we may face. The first kind of message said that the protections around Giza had broken down. The vibrational level was lower and we could see the density of the energy and the difficulty of working there. The other kind of message and the most recent was about the potential for conflict, especially when we reach the Sinai Peninsula. There we must be careful not to engage dualities. Competing forces are pushing back and forth there all the time. We must clearly work at a higher level than any of these forces and not be drawn in.

Our group gathered this day in Giza at the home of the Fayed family, where the great Egyptian spiritual guide Ahmed Fayed had once lived. Our guide for this trip would be Abdullah Fayed, cousin of Ahmed and an heir to his legacy. We were five Swedes and two Americans. Agneta Jonsson, Gunilla Corell, Linda Falkenby and Monica Lindblad had all studied Pleiadian Lightwork with Ulla in Sweden. Anne Wells and Gary had worked together with Peruvian Shamanism back in the United States.

First day---Temple of Osiris

Everyone assembled in the morning on the roof of the Fayed home directly across from the Giza plateau. From here we were face-to-face with the Sphinx and watched the morning sunlight illuminate the pyramids. Ulla and Gary introduced the group to the work of weaving Giza and Sakkara into the New Earth. We shared the vision we had been given in regard to the Sirians and the two paths for earth's evolution. We also discussed the precautions and warnings we had been given. Everyone heard that the work would be conducted from within the energetic space of the New Earth. This meant that the group would need to blend together and work at a higher energetic level than ever before. Every one of us would have a high level of responsibility.

We climbed into our small bus for the ride to the Temple of Osiris. Besides the main temple, there were small pyramids to the left and to the right. This is a site that is only slightly excavated despite the many layers of ancient history. The Temple of Osiris is usually closed to tourists, but our guide, Abdullah, who is very experienced in such things, persuaded the guards to let us in. Importantly for us, the Temple of Osiris is situated on a line connecting Giza and Sakkara. This is how we would start the journey's work.

We formed our circle in the center of the ruins, each of us sitting on a folding chair. This day's task, as we envisioned it, was to conduct energy to both Giza and Sakkara while we connected to the line between them. When setting our space, we took special steps for bi-locating ourselves within the New Earth. We experienced the flow of energy into the line and out to Giza and Sakkara in a variety of ways. Monica saw a tube of light going into the Earth. Ulla saw the whole group holding up their hands to take in the energy. Gunilla saw the energy like a flower that she related to the energy of Christ consciousness. Agneta saw an infinity symbol stretched between Giza and Sakkara with the crossover point here at the Osiris Temple. Monica saw an eagle's wings spread between the sites. Anne, Linda and Gary saw the energy running between the sites like water. Gunilla saw this energy as gold. As usually happens, our minds grasped the energetic event through metaphorical images.

The metaphorical image of water has a connection to some things we know about the Giza-Sakkara area. For certain, water used to flow freely here when the Nile ran from Sakkara passed the paws of the Sphinx. There is also a story told by some native guides that water used to run between Sakkara and Giza in underground tunnels. (We are convinced that these tunnels exist although they are all closed up now.) Another story told by psychics is that the Great Pyramid was energy source powered by water.

After a while several people in the group took on specific assignments. Linda saw connecting lines to Ale stenar (in southern Sweden) and Nazca in Peru. Anne moved back and forth between the pit of the Great Pyramid and Sphinx. Ulla saw that the Great Pyramid served as a power plant in the 5th dimension and that it's power was needed to get things done. Gary saw that the flow of energy between the sites was connected to machinery in the 5th dimension that began to move and to help propel our process. At the level of the 15th dimension Ulla held the template of a new energy that needed to be brought in. She called for Gary and they both escorted the template down through the dimensions while everyone sustained the process. When it came down, Ulla saw the New Earth Giza area---a vision of where we were headed. She saw energy flowing downward into the whole area and was told we would be the vessels for that transformation. We came out of trance celebrating how much light had propelled our work.

Not only were we delighted, but also the guards were glad to see us pick up our chairs to leave! We rejoined our bus for a welcomed intermission with our box lunches, which we topped off by driving to

the luxurious Mena House Hotel for coffee. Afterward, we returned to the Fayed house to work from the roof.

This session was about receiving information and energy for the days ahead. Anne described her vision of working from inside the Great Pyramid to connect the three interior rooms together. Gary made contact with the Sirians again. Ulla had a vision of the Sphinx opening and the spirit of the Sphinx coming forth. Depending on what we accomplish, she was told, we may be able to perform an activation of the Sphinx by the end of our trip. This activation would be the second of three important activations. The first was already completed by others. The third is a year or more off in the future.

Second Day---Sakkara

Our goal was to reach the Sakkara pyramid before the crowds hit. We left the Fayed house after a quick breakfast of Egyptian bread, cheese and tea, and boarded our bus for the ride to Sakkara. Although Sakkara is only a short ride from Giza, it has a very different energy. Sakkara is both the oldest pyramid in Egypt and the anchor point for a City of Light. To many of us who have been there, it is one of the most sacred places on the earth.

We certainly did beat the crowds. The great plaza in front of the pyramid was empty. But the area behind the pyramid, where we had intended to work, was closed off. We eventually found a place up past an embankment where we wouldn't be seen by people on the main plaza. We formed our circle and began our ceremony just as we had done the previous day---we bi-located into the New Earth. A column of light formed in the center of the group. Gunilla saw Jesus putting seeds of light into everyone's crown chakra. Linda spoke of the importance of staying the heart, a message that others experienced too. We were now focused on one of our core tasks, to help establish the Sakkara City of Light in the New Earth.

Gary was drawn to the 5th dimension where he kept focused on the machinery that he had seen the day before. It moved faster and faster as the group's work began to flood the space with energy. After a while, a much lighter energy emerged and new machinery seemingly replaced the old. This newer energy eventually filled the 5th dimension and began moving up through the higher dimensions one at a time, accumulating power until it reached the 15th.

We were not the ones who had planned how the City of Light would be established in the New Earth. And now, in the 15th dimension there was a huge structure waiting to be brought in---a new City of Light. The city had not simply descended from above but was powered by the energy from below, the energy that poured in through the connection to Giza. This huge structure simply emerged from a tube of light and began to solidify.

Anne stayed in the triangular space between the heart of the Sphinx, the pit of the Great Pyramid and the Sakkara Pyramid helping to sustain the energy flow. Under the Sakkara Pyramid Agneta saw a massive stone block with stuck emotions and feelings. Monica felt that she was in the stuck part and worked to set things free. Ulla had been observing the human attachments that interfered with the connection to the New Earth. She discussed the need to release these attachments in relating to the gods, the need to release Osiris and Isis, and all these old ways that people related to Sakkara. Gunilla had a vision of Jesus taking a little girl to visit the Sakkara Mystery School. The girl met with an old teacher under the pyramid, but when the man became dark and controlling, she broke away to return to the plaza with Jesus. It was there that she experienced spiritual evolution. The Sakkara of the New Earth must have a different orientation, and as the City of Light formed, the blockages and old patterns dissolved. Anne had been working from a place of no-time/no-space and said that something big was about to happen. From a place of no-causality Gary helped to shift the City of Light toward the state of its future. There came a moment at which we experienced the final arrival of Sakkara and the City of Light in the New Earth. Ulla invited everyone to come visit the City.

We took a short break during which we became aware of how many people were now milling around Sakkara and walking up passed us. We turned down the many offers of post cards and camel rides and went back to work.

It was a more gentle start. Ulla started in the 15th dimension holding the Template for the New Human. Gary was drawn there and watched with Ulla as the template came down through the dimensions. As the template reached the bottom of the City in the 5th dimension, a bright light radiated out. The City was in place and the template of the New Human was enthroned. When the Template arrived, Agneta felt total inner peace. She saw the infinity symbol of giving and receiving and observed that we in this 3D world had problems in receiving. We need to master that before we can give completely. We were done. Incredible as it seemed, there was now a second reality at Sakkara, a reality in the New Earth.

Third Day---Journey to Sinai

It was an early bus ride through Cairo to the airport. Due to morning traffic, we took an alternative route passing through many unfamiliar neighborhoods where we watched the people starting their day. The sunlight was bright and clear as our plane took off for Sinai. From high above the earth, we could see where the Red Sea led into the Suez Canal. We observed the beauty of Sinai's hills and mountains, seemingly devoid of water or life. That amazing expanse of unforgiving, harsh land gave way to the gentle edge of the sea. We landed in Sharm el Sheikh, the resort town on the southern tip of Sinai. After a short stop for a late lunch, we headed north through the darkening landscape toward Mt. Sinai and St. Catherine's Monastery.

After a welcomed dinner in the hotel, we gathered in Anne's room for our first Sinai ceremony. Our general goal was to bring in energy for peace in the Middle East. Ulla and Gary set the space by building a field of energy around the group. At first, the group's energy was wobbly, but when it settled down, we all rose up to a higher frequency. We quickly realized that we were creating a great ball of white light. We fed it from our hearts. Guides came in to assist including Christ who gave a dove to each person. This ball of energy grew larger and larger covering more and more of the region. It expanded into the higher dimensions, the 4th up to the 8th, and it broke through into the 2nd dimension. Ulla saw the ball expand to include Israel and Jordan. As it expanded into the 1st dimension, the energy of Lord Maitreya came down through the middle to take hold of the 1st dimensional space. Suddenly the ball shrank and disappeared. From up in the high dimensions a heavenly energy came down on everyone like divine rain. It was a deep blessing that penetrated everywhere. Then we were done.

Fourth Day---St. Catherine's and Mt. Sinai

When we arrived at St. Catharine's Monastery in the early morning, there were hundreds of people streaming down the trails off the surrounding mountainside. As pilgrims of many religions had done for hundreds of years, they had kept vigil on Mt. Sinai during the night and were now returning to the Monastery after having watched the sunrise from the mountaintop. Within thirty minutes the tide of pilgrims was spent, which meant that we now had the space to form our circle near a few trees at the rear wall of the Monastery.

We had possibly expected a continuation of the work from the previous night, but it was more difficult setting the space here in this complex place. Ulla saw that the monastery had gone through periods of both light and dark. Gunilla had a vision that parts of the New Earth were still connected to the Old Earth in sorrow. We all began clearing.

Agneta and Gary were focused in seventh dimension, opening space and connecting down through the dimensions. Within the 7th dimension, a sanctuary was established for the Ascended Masters and a Master came in to take possession of it. As a number of us moved to the second dimension, Linda, working through her body, experienced a release in her second chakra. And just as we thought that we had reached a limit, Lord Maitreya's energy came in again through to the first dimension. There was more going on here than we could immediately grasp and the work felt like drilling through concrete. We hoped to get a better understanding when we continued the work in the afternoon.

We now went to tour inside of St. Catharine's. Emperor Justinian had ordered the construction of the Monastery in 527. It has survived through all these centuries in part because it was a sanctuary for early followers of the Prophet Mohammad, who signed a decree for its protection. Today it is operated by the Greek Orthodox Church and houses one of the world's greatest collections of icons and ancient manuscripts. The monastery along with Mt. Sinai is a destination for visitors from Christian, Jewish and Islamic countries who are able to view icons and walk through the central sanctuary.

Our focus shifted now to Mt. Sinai, the place where tradition holds that Moses received the Ten Commandments. We all boarded camels for the ride up those steep trails. And, despite mixed enthusiasm for riding camels, we were glad to have ridden when we saw the length of the trail and especially how high up we climbed---715 meters or 2,300 feet above the Monastery. Even at that, the camels only take you so far. We left the camels at a stopover where we were able to get a hot cup of instant coffee. Then, we began our way up the “750 Steps,” the winding passage to the summit where a Christian chapel and a small mosque set upon the peak of Mt. Sinai.

We formed our circle on a ledge off to the side of the chapel overlooking a huge expanse of rocky wilderness. The energy here was entirely different from the Monastery below. As we set our space, a Merkaba quickly formed around the group that began spinning faster and faster. We were pulled up into a 9th-dimensional connection that we all felt come in with a “click.” Ulla shared a vision of the three religions of the region melting together and she saw that the Ascended Masters had a great peace project to unite the region. Agneta saw a vision of two blocks representing these religions that would not fit together but which finally merged when light from above softened the forms. Gary saw the 9th-dimensional awareness as the foundation of the new consciousness that would drive the changes in the region. The group had earlier witnessed at Sakkara that one theme of our work was the release of old traditions in order to make way for the New Earth. Gunilla saw the tablets of the Ten Commandments falling apart and Linda felt the earth consciousness moving up from the 3rd chakra awareness to the heart. Monica talked about the wisdom of feeling. Gary recognized the energy of the group streaming out from the mountain into the Sinai Peninsula. It was sowing the seeds of new possibilities, putting new options in place for the people of the Sinai. It had been a huge influx of high dimensional energy.

We had been particularly careful in setting the space and we moved through releasing the space very consciously. At the end, we were quite blended in the high dimension and we held hands to hold the connection in the lower dimensions. The sun had slowly been setting behind the distant mountains. We made our way down the 750 Steps as the last light faded away. All that remained was the journey down the rocky paths from Mt. Sinai in the darkness.

When we reached our hotel, we discovered that the staff prepared for a New Year’s Eve celebration. We all had an excellent dinner, but only Linda and Agneta had the stamina to stay up until midnight!

Fifth Day---Return to Giza

A late breakfast followed by a long bus ride back to Sharm el-Sheikh. At least in the daylight we get to see the incredible landscape that we had missed at night. After a long search for a quiet place to eat, we caught the plane back to Cairo where we settled into our rooms at the Fayed house in Giza. It was New Year’s Day, in this case, a day devoted to traveling.

Sixth Day---Homage to the Nile

When Ulla and Gary had originally planned this trip with guidance from the Sirians, it was imperative that we connect to the Nile. Of course, how could we be working in Egypt without paying attention to the element of water? We had planned for a ceremony on the shore of the Nile, but Abdullah, our guide, had done one better and arranged for us to hold our ceremony while sailing on a traditional Egyptian Felluca

boat. Our boat moved out and anchored near an island in the Nile green with vegetation. Beyond the shores were busy streets of Cairo, but in our boat was peace, tranquility and the sounds of birds.

Sitting as we were on the boat, we couldn't form a genuine circle but we were able to cluster together. While establishing our space, we reflected on how all the water that has even been on the earth is the same water that is here with us today. We considered how all the water of the planet has at some time flowed down the Nile. Besides the clearing that we could bring to the Nile, Ulla saw that we needed to clear our bodily waters in order to be ready for the next day's work. We must be in right relationship with the element of water.

We formed a connection at the 7th-dimensional level. Christ came in quickly for Monica and said, "I am the source of life. I am the water of life. Clearing the mind is like clearing the water." The message also told us that we needed to learn to utilize water's cycle of cleansing. Agneta connected quickly and found the water very muddy on the bottom, but as the group's vibrational level went higher, the purer water went deeper and deeper. She saw the new fresh water spreading over the globe. Gunilla saw clear water going to the center of the earth. Gary had a vision of how much water is like the emotional body of the Earth. All of the emotional energies of Earth's history are stored in the waters. He worked to clear heaviness and debris, but the immensity of the terrible heavy legacy built up in the waters of the Earth became overwhelming. Everything that humanity has failed to clear is still held there. While we had accomplished our mission, we also had been given another insight into just how close the relationship is between humanity and the Earth. Anne closed the ceremony by pouring a collection of sacred waters into the Nile along with coals from sacred fires.

Seventh Day---The Solar Cross at Giza

However much we would be able to accomplish in the next two days would be the culmination of our work, Our goal was nothing less than to create a new future for Giza, an alternative reality in which Giza was reborn in the New Earth. In the early morning we gathered near the third major pyramid, the Menkaure pyramid, for a trip into the desert to the south. We road horses and camels to the place called the Solar Cross, a small enclosure around what appears to be a deep well. Our guidance had been clear that this was the real center of the Giza complex. We approached the site, but we couldn't get close to the Solar Cross because the leader of a nearby archeological dig wouldn't let us approach. We didn't react to his fear. We simply took up a position behind a nearby hill where our guidance led us.

It was very important for this day's work that the group maintain a strong connection. As we raised our dimensional level, everyone felt the space lighten and the work progress. Given the importance of the work, we asked for the presence of the Grand Masters of the Light who are the Judges and Overseers of the Earth's transition. Gary was immediately taken up with the Sirians and saw the Giza Plateau from their perspective. They were focused on a large circular area with the Solar Cross at the center. In one quadrant were the Pyramids and Sphinx, an area that seemed devoted to education. The opposite quadrant appeared to be a garden area. It was quite feminine and Sirian in its grace and beauty. The whole of Giza appeared to be a Sirian design. Ulla too had seen the whole Giza plateau. In her vision it was green and beautiful.

Gary was then directed up to a high dimension from which a huge circular array of crystals started coming down through the dimensions. When it reached the 10th dimension, it began to create an energetic field directed into the Sirian's circle of Giza. The energy was very strong and penetrated through everything. Later, that array of crystals was replaced by what appeared to be a circle of circles producing a different energy. While the first array seemed to help elevate and separate, the second seemed to consolidate and solidify. Ulla was drawn to the Solar Cross when she saw the circular matrix coming down. Monica's vision was filled with geometric forms and symbols while others spoke of encodings and messages. The whole of the Giza area was being transformed and reborn in the New Earth. The Sirians

now had an anchor in the New Earth, an anchor that would be important in helping to separate the New Earth from the old.

Gary asked the Grand Masters of Light whether guarantees were in place to insure that this project was in alignment with the highest potential for humanity. This question started a process of conversation and negotiation that paused the entire project. The Grand Masters of Light were negotiating points with the Sirians and it took some time before everything was worked out. It was very important at this critical juncture for humanity that people not be vulnerable to enslavement or other forms of control by higher-dimensional beings as had happened so often in past eras. The humanity of the New Era should be completely free to control its own destiny. But, this change has two sides to it. Humanity could be free from enslavement but also deprived of guidance like that given by the Sirians. As people of the New Earth, we will have different issues to contend with: the challenge of taking complete and total responsibility for ourselves.

At the end of our ceremony we were asked to consider whether we were really prepared to be this New Human. It is a much more profound question than it might at first appear. This is also the question that Egyptian Initiates were asked---whether they were really ready to take full responsibility for every aspect of themselves. Anne raised the consideration of all those people who cannot take this step and who may be left behind as a consequence. Linda remarked how by taking this step we become the equals of those who have been our spiritual guides.

We returned to our bus for a quick box lunch of falafel. Afterward, we walked over to an out-of-the-way spot east of the Menkaure pyramid to set up our circle. Here once again we were set upon by an official who permitted us stay only after our guide, Abdullah, had calmed the waters. Maintaining the group concentration was difficult. We all focused hard to complete the process started in the morning. We held to our vision of the New Earth Giza and sustained that vision for a long time as energy began to flow into the Giza Plateau. We received the message that our

work was clearly about the Earth's future without compromise from other agendas. Toward the end of the ceremony Gary saw that the Sirians had penetrated deep into the earth under Giza and had sifted the very core of the land there. Giza had been secured in the New Earth. Ulla was told "Now the work is done."

But well before that moment occurred, Ulla was given a vision of the community of beings living in the 5th and 6th dimensions under the Great Pyramid. Reports of this energetic bubble populated by beings from a prior time had been reported by spiritual seers for many years. Ulla and Linda entered the space together. Linda described the inhabitants as having bodies with big heads, big ears, and looking very depleted. Agneta and Monica had the same image. Ulla received the understanding that these people had been stuck here for thousands of years. Their release was necessary in order for Giza to move into the New Era. Ulla and Linda were guided to bring in energy from the higher dimensions, an energy that seemed to fall on the inhabitants like refreshing rain. Agneta saw the symbol of two rivers crossing, a clear river and a dirty, dried-up river. These people seemed depleted for lack of the clear water energy. (We all thought back to the work at the Nile.) Eventually, when the people appeared restored, the high-dimensional being known as the Egyptian god Thoth entered. He began transporting them to another place in Merkabas. By the end, all were gone.

In Anne's vision, the lion part of the Sphinx began to move and then the human part. (She saw that the Sphinx had a partner in another quadrant of Giza---a female.) Agneta and Monica saw the Sphinx moving too and Gunilla saw the Sphinx get up and walk around. As our ceremony came to a close, the question that had ended the morning session came back to us again. Were we ready? Anne was transported to where the energetic spirit of the Sphinx began reading her heart. Then everyone's heart was read. The answer was critical to the activation work we would do the next day.

Later at sunset, we had the opportunity to ride horses back to the Solar Cross. This time with no one to stop us, we rested by the well.

Final Day---The Activation

We gathered for one last ceremony. This morning we met on the roof of the Fayed home. It was bright and sunny and we sat directly facing the Sphinx. We listened to the call to prayers echoing across the city and waited patiently for the sound to die out before we began our work. While we were setting our space, Gunilla saw Christ bringing flowers to us and making a protective field. Christ consciousness streamed into each person's higher self.

We all focused on the Sphinx. Ulla saw the Sphinx as falling apart, especially on the right side. What remained was the rock core. Deep within the rock core and toward the back, we saw the energy of the Sphinx. Some saw it as a crystal, some as a beam of light. As the light expanded, we had to stabilize the energy in the 7th, 9th and 15th dimensions. We had to hold the energy in order to achieve the activation.

Anne worked to connect the beam to Divine Source. Linda was taken into the rock and then into the Hall of Records, a place of ancient legend discussed by Edgar Cayce. When Linda asked to be connected to Source, she connected through her heart and slowly took the energy down into the Sphinx crystal.

This energy appeared to magnetize fear. After calling in Lord Maitreya, the fear, humanity's fear of its own evolution, crystallized and was carried away by Archangel Michael. Afterward, Linda connected to source and to the Sphinx like Anne. Monica saw codings and figures like those in the Hall of Records. Gary was in the Hall of Records too where he asked to see the earliest history. It began with the Sirians creating the first humans. What people call the Hall of Records is the birthing place of all humanity.

Ulla saw the connection between Sirius and the Sphinx. She was taken up to Sirius where she connected the beam of the Sphinx to Sirius once again. This was in fact the key to the activation: to reconnect the Sphinx to the Sirians just as it had been in early earth

history. This helped to explain why the Sirians were so central to the future of Giza. Their role on earth is as important to their heritage as it is to ours.

Other connections to ancient history emerged too. Agneta was connected to the Andromedians who were also involved in creating humanity. Gunilla was connected to Lemuria. Anne saw the four quadrants of Giza as connected to the four forces of Mu and she remembered the experience of the four forces creating the earth.

Gary called everyone back to direct energy on the Sphinx and to crystallize its relationship to the New Earth and the New Humans. As our intent became clearly focused, we saw the new Giza Plateau in the reality of the New Earth in all of its beauty and power. That was a payoff for all this work. We did it!

After we had closed our circle, Ulla shared with us how the day's work had completed a mission from her past. It turns out that years ago Ulla had had a vision of seeing Giza from the viewpoint of Sirius. She knew that she had a mission to accomplish but was unable to grasp what it was. Today upon visiting Sirius, the king of Sirius had greeted her and told her that she had finally accomplished her mission. It had been a ten-year process to get to this point.

We have all returned home now from Egypt. We have had our chance to settle back into everyday life. But we also realize that the activation of the Sphinx was effectively 'turning the key in the lock' and 'starting the motor.' The Giza Plateau is central to the New Earth. It is an energy plant that will help to separate the New Earth from the old. We wonder just how soon in the future that event may arrive.
